# FIXING & SETUP GUIDELINE

## INSTALLATION GUIDELINES

- Doors can be cut on all the sides up to 12mm per side. Trimming should be done on both sides equally.
- Subsequent to trimming all sides should be primed or sealed with wood sealant and must be applied immediately.
- Bottom of the door must be painted/polished before installation of the door is done.
- Hinges must be aligned before fitting the door, to avoid bending. It is recommended that you fix two hinges in the upper portion on the door with a gap of 6 inches from each other and by leaving a gap of 12 inches from the top, for the first hinges.
- We will not be held liable for any of the damages due to the wind or any external forces.
- If the doors are trimmed more than 12mm in width or height from any side, the manufacturing warranty shall be void and Greenply shall not be responsible for the same.
- Bathroom doors must be fitted with teak or hardwood lipping at the bottom to prevent moisture absorption.
- 3mm space between the frame and door must be provided on all sides of the door shutter.

## STORAGE GUIDELINES

Store flat on a level surface in a clean, dry, well ventilated building. Protect from dirt, water and abuse. Allow air circulation.

Doors should not be subjected to abnormal or sudden variations in heat, dryness or humidity and should not be exposed to direct sunlight. Recommended humidity and temperature are 25% – 55% RH and 50°F – 90°F (10°C – 32°C).

## WARNING

Distortion, warping, bowing and waviness, can appear as a result of incorrect topcoat (paints or stains), improper finishing techniques. These are caused by incorrect topcoat, watered down paints, high humidity environments, excessive application of paints, and doors not being acclimated properly.

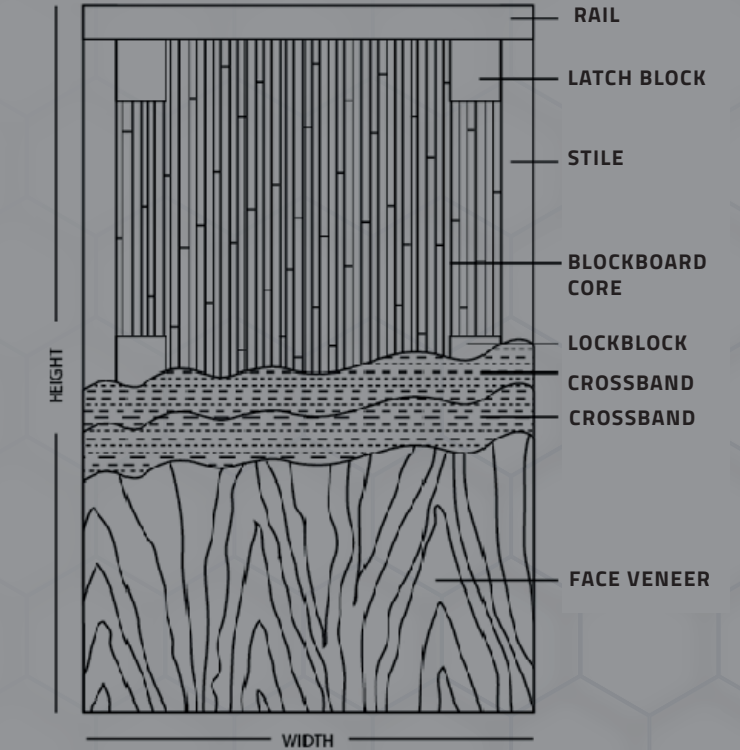

Please read and understand the entire procedure before attempting to finish your doors. Be sure to follow the coating manufacturer's warnings and instructions on all product labels. Greenply does not warrant any coating unless applied by Greenply. Any damage caused by or resulting from the application of a stain or paint will void the door warranty.

Greenply gives warranty only for its product. If it is found that there is a manufacturing defect, Greenply shall repair only for its product and will not be responsible for any value addition what so ever.
